Synopsis

The 6th International Oil Palm Biomass Conference 2026 (OPB 2026) serves as a premier regional platform that brings together policymakers, industry leaders, researchers, technology providers, and sustainability practitioners to explore the future of oil palm biomass utilisation.

With the theme "Revolutionizing Sustainable Innovation in Evolving the Biomass Economy" the conference will focus on innovative strategies, emerging technologies, and policy frameworks that support value creation from oil palm biomass while advancing sustainability, circular economy principles, and climate commitments.

Through keynote sessions, technical presentations, and panel discussions, IOPBC 2026 aims to foster knowledge exchange, cross-sector collaboration, and actionable insights to accelerate the transition of the oil palm industry towards low-carbon, resource-efficient, and high-value biomass solutions.

Objectives

The key objectives of the 6th International Oil Palm Biomass Conference 2026 are to:

- Provide a comprehensive platform to discuss current trends, challenges, and opportunities in oil palm biomass utilisation.
- Showcase innovative technologies and best practices in biomass conversion, valorisation, and downstream applications.
- Promote the adoption of circular economy and sustainability principles within the oil palm and bio-based industries.
- Facilitate dialogue on carbon markets, climate mitigation, and ESG-driven strategies linked to biomass development.
- Support informed decision-making and strategic planning for the future development of oil palm biomass industries.
- Strengthen regional and international collaboration among industry players, policymakers, researchers, and investors.
